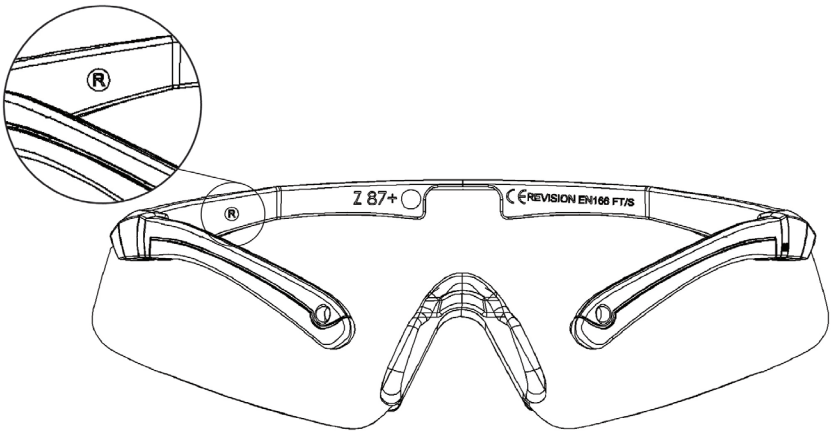
SAWFLY®

IDENTIFY LENS & FRAME SIZE

How Do I Know What Size Sawfly Eyewear I Own?



FRAME SIZE

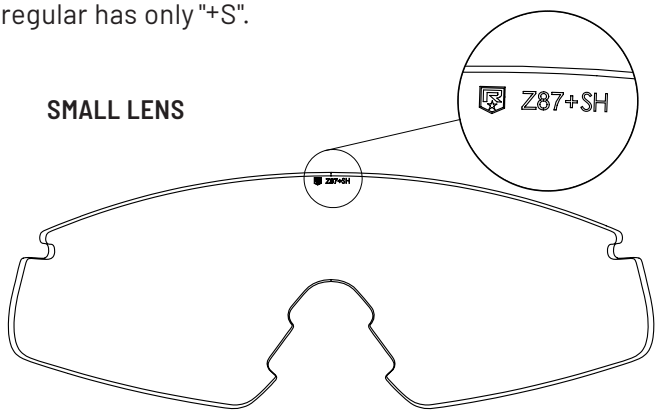
The size of your Sawfly frame will be on the inside of the brow. **NOTE:** Small and Regular eyewear use the same frame size. There is no separate Small frame. To identify Small eyewear, check the size markings on the lens. If the lens is marked +SH, your eyewear is Small.

LENS SIZE

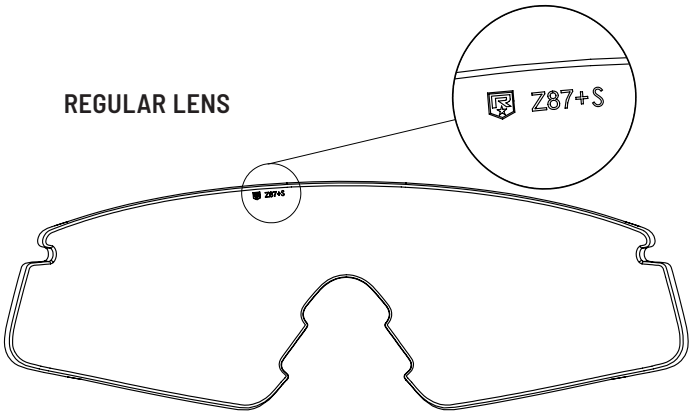
To find the size of your Sawfly lens, remove the nosepiece from your eyewear. Look at the curve on the lens where the nosepiece fits.

On the small and regular sized Sawfly lens, there are two sets of notches – one at the bottom and one at the center of the curve. The small Sawfly lens also has an "+SH" marking on the inside of the lens above the nosepiece. The regular has only "+S".

SMALL LENS



REGULAR LENS



LARGE LENS

On the large Sawfly the nose piece cut is smooth with one set of notches at the bottom of the curve.
