

# SAWFLY® R3 MAX-WRAP EYEWEAR SYSTEM

## CUSTOMIZABLE OPTIONS & ACCESSORIES TO FIT THE MISSION

**SAWFLY R3 MAX-WRAP EYEWEAR SYSTEM** has upgraded temple arms to improve fit, comfort, and retention; a revised brow design sits cleaner against the face; and a fresh look provides sharper style and a lower profile. The MAX-WRAP lens provides maximum lateral coverage for ballistic and environmental protection and comes in a variety of lens options which are covered by Revision's OcuMax® Anti-fog and scratch resistant coating. All these aspects stem from the principle goal of better integration with helmets and head subsystems while preserving the proven characteristics of Revision's ballistic protection.

### AVAILABLE LENS OPTIONS & TECHNOLOGY

Revision's lenses come in 3 categories; standard lenses, I-Vis® lenses and LazrBloc® lenses. Each tint has a purpose and is designed to maximize visibility, minimize interference and optimize performance. Lenses are made out of indestructible, optical-grade polycarbonate and can be inter-changed quickly for different light conditions and environments - all providing 100% UV-A-B-C protection.

OcuMax® is Revision's proprietary next-generation anti-fog lens coating designed to maintain clarity in extreme conditions.

I-Vis® is Revision's custom-engineered lens solutions – each designed to maximize visibility, minimize interference, reduce eye fatigue and optimize performance for the environment you are operating in.

LazrBloc® encompasses a suite of unique laser protective lenses, specially developed for precise laser eye defense against a variety of light energy wavelengths.

REVISION.

## CUSTOMIZE YOUR ACCESSORIES TO FIT YOUR MISSION

Revision's eyewear systems have a variety of options of accessories to tailor to any environment and mission. Choose from the below options to complete your Sawfly R3 Max-Wrap eyewear kit to fit your mission.

### MISSION SWITCH® ACCESSORIES

MissionSwitch technology allows you to quickly adapt your eyepro configuration to improve integration with other equipment. You have the power to adapt on the fly, when you need it the most.

#### EXTENDABLE & FLEXIBLE ARMS

Un-matched adjustability with new flexible arms that bend to shape and extend for optimal fit and retention. For optimal comfort, best used without comms.

#### THIN TEMPLE ARMS

Lean, extendable arms that guarantee comfort with over-ear hearing protection or comms. Compatible with other headwear equipment.

#### TEMPLE STRAP

Connects to your eyepro, taking the place of the temple arms and is adjustable for custom fit and retention.

#### UNIVERSAL SPECTACLE GASKET

Enables you to quickly and easily convert your spectacles to goggles to protect against dust, wind, and debris.

#### PRESCRIPTION RX CARRIER

A rugged, convenient solution to needing corrective lenses and improve eyesight that integrates into your protective eyewear.

### ADDITIONAL ACCESSORIES

Add-ons to elevate superior eyewear beyond peak performance.

#### ADJUSTABLE NOSEPIECES

Modify the nosepiece—by extending or retracting—to match your preferred fit and positioning.

#### HEAD STRAP

Connects to the end of the extensible arms and is adjustable for custom fit and retention.
