

THE SNOWHAWK[®] COLD WEATHER GOGGLE SYSTEM

Protects in the most extreme environments, completely eliminating exposed skin.

Revision's **SNOWHAWK COLD WEATHER GOGGLE SYSTEM** is a full coverage ballistic goggle with leading OcuMax[®] anti-fog performance and dual-pane thermal lenses for operations in the most unforgiving, extreme cold environments. The SnowHawk goggle is a key component of the Gryphon ecosystem - which provides seamless integration between your eyepro and face covering - and features GrypMag[™] technology. With GrypMag[™] technology, we have integrated Anon[®]'s MFI (Magnetic Face Integration) solution into an interchangeable system that integrates protective eyewear and headwear. Built-in magnetic attachment points in the goggle frame and headwear give you the ability to quickly connect them together, protecting you from the elements.
