

REVISION GOGGLE RAIL MOUNT ADAPTER SYSTEM

Ability to attach your Revision Goggles to your Team Wendy helmet-mounted rails.

The **REVISION GOGGLE RAIL MOUNT ADAPTER SYSTEM** combines the necessary hardware and Revision's Swivel Clip System required to attach Revision Goggles to your Team Wendy helmet-mounted rails. The Rail Mount Adapter System keeps the goggle secure during rigorous activity and gives the ability to quickly change the positioning of the goggle straps along the helmet rail. Also, don or doff the goggle easily when conditions require it.
