REVISION GOGGLE SWIVEL CLIP SYSTEM

Ability to attach your Revision Goggles to your helmet-mounted rails.

The **REVISION GOGGLE SWIVEL CLIP SYSTEM** consists of the pull-to-tighten or tri-glide straps and swivel clips required to attach Revision's Goggles to your helmet-mounted rails. The Swivel Clip System, part of the MissionSwitch® collection, ensures goggle / helmet integration and operator equipment compatibility. The swivel clip straps allow for the goggle to attach to helmet-mounted rails, keeping the goggle secure during rigorous activity. Also quickly change the positioning of the goggle straps along the helmet rail, and don or doff the goggle when conditions require it.

ADJUSTABLE STRAP
ensures one size fits all

Compatible with **OPS-CORE ARC™**,
GALVION®* AND **TEAM WENDY EXFIL®*** 2.0 AND 3.0 RAILS

REVISION SWIVEL CLIP SYSTEM COMPATIBILITY			
REVISION SWIVEL CLIP SYSTEMS	HELMET SYSTEMS		PART NUMBERS
